this text details the design of cost effective environmentally friendly lubricant additive technologies and components for the
automotive industrial manufacturing food and aerospace industries presenting methods to improve the performance and
stability of lubricants protect metal surfaces against wear and to control deposits and contaminant

chemistry and technology of lubricants describes the chemistry and technology of base oils additives and applications of liquid
lubricants this third edition reflects how the chemistry and technology of lubricants has developed since the first edition was
published in 1992 the acceleration of performance development in the past 35 years has been as significant as in the previous
century refinery processes have become more precise in defining the physical and chemical properties of higher quality mineral
base oils new and existing additives have improved performance through enhanced understanding of their action specification
and testing of lubricants has become more focused and rigorous chemistry and technology of lubricants is directed principally
at those working in the lubricants industry as well as individuals working within academia seeking a chemist s viewpoint of
lubrication it is also of value to engineers and technologists requiring a more fundamental understanding of the subject

now completely revised and updated this definitive reference provides a comprehensive resource on the fundamental principles
of lubricant application what products are available and which lubricants are most effective for specific applications it also
offers a detailed and highly practical discussion of lubrication delivery systems you ll gain a clearer understanding of the why

of relevant industrial lubrication practices and importantly how these practices will facilitate optimized results lubricant applications covered include bearings and machine elements in earthbound electric motors process pumps gas compressors gas and steam turbines as well as many other machine types an examination of the most advantageous ways to procure lubricants to understand contaminant filtration and to implement cost justified means of lubricant storage is presented also provided are expert tips on lubricant handling techniques procedural setups how and when to perform oil analyses critical maintenance practices equipment reliability issues and more

in this work the reader will find the main analytical methods for evaluating and monitoring liquid lubricants classified as a function of properties related to performance the descriptions and discussions in this book covering the vast and developing field of lubricants will allow students as well as engineers and technicians involved in the development application and monitoring of lubricants to find the information which is both essential and useful to their profession contents 1 analysis of oil constituents 2 physical properties 3 physico chemical properties 4 microbiological properties 5 analysis of marketed oils and used oils bibliography index

this guide serves as a workbook to be used in conjunction with an approved course offered by a training partner recognized by the international council for machinery lubrication icml for a machinery lubrication technician mlt i or ii certification exam preparation course the essence of this work is a guided cooperative and sometimes even argumentative dialogue between the authors with continuous asking and answering of questions this stimulates critical thinking which in turn draws out underlying presumptions and results in readers thinking like the person who actually built the exam the authors are strong proponents of a unique 5 step process for learning 1 familiarize 2 find socrates 3 be the exam 4 practice exam 5 explore this unconventional method has proven to be exceptionally effective not for only passing the exam but to truly retaining the knowledge and becoming an expert in the content you re studying certification requirements are discussed throughout the work making this the ideal resource for prospective mlt i and or mlt ii certification candidates unique structured learning notes
